Storm Data and Unusual Weather Phenomena

November 2000

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Number of Persons Injured	Estimated Damage Property	Estimated Damage Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------------------------------	---------------------------------	------------------------------	--------------------

INDIANA, Southwest

Vanderburgh County

Evansville

09 1148CST 0 0 20K Thunderstorm Wind

Strong winds tore off a 100 by 30-foot section of roof from a supply company. The roof damage allowed rain to leak into the building, causing further damage. Some bricks were knocked off a nearby building, and metal siding along the top of the building was ripped away. Debris fell in a nearby parking lot. The damage was near the intersection of U.S. Highway 41 and the Lloyd Expressway.

Vanderburgh County

1 NNE Dress Mem Arpt

09 1200CST 0 0 Funnel Cloud

A firefighter reported a funnel cloud just north and northeast of the Evansville Airport

Vanderburgh County

.5 SE Evansville to 3 NE Evansville

09 1201CST 0 0 5K Thunderstorm Wind (G54)

A spotter estimated wind gusts between 65 and 70 MPH on the southeast side of Evansville, along the Ohio River. Trees and power lines were down near Highway 57 and Kansas Road, a few miles northeast of Evansville.
